Our [Abpromise guarantee](#) covers the use of **ab108322** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

アプリケーション	Abreviews	特記事項
WB		1/1000 - 1/10000. Predicted molecular weight: 45 kDa.
IP		1/10 - 1/100.
IHC-P		1/100 - 1/250. Perform antigen retrieval.

追加情報 Is unsuitable for Flow Cyt or ICC.

ターゲット情報

機能 Cysteine protease required for autophagy, which cleaves the C-terminal part of either MAP1LC3, GABARAPL2 or GABARAP, allowing the liberation of form I. A subpopulation of form I is subsequently converted to a smaller form (form II). Form II, with a revealed C-terminal glycine, is considered to be the phosphatidylethanolamine (PE)-conjugated form, and has the capacity for the binding to autophagosomes. Preferred substrate is GABARAPL2 followed by MAP1LC3A and GABARAP.

組織特異性 Widely expressed, at a low level, and the highest expression is observed in skeletal muscle and brain. Also detected in fetal liver.

配列類似性 Belongs to the peptidase C54 family.

細胞内局在 Cytoplasm.
