### 追加情報

ELISA: 1/11 000.  
WB: Use at an assay dependent dilution.

The Western blot displays a multiple band pattern. This is due to the reactivity not only with the hexon, but also with the other structural proteins associated with the hexon to make up the assembly. Bands at ~28, 29, 32, 35, 45, 50, 63, 65, 74, 82 kD and possibly more could be observed.

Not yet tested in other applications.

Optimal dilutions/concentrations should be determined by the end user.
