HsSatellite 2 repeat ChIP primer (Reverse) ab83619

製品の概要

製品名 HsSatellite 2 repeat ChIP primer (Reverse)

特記事項 The primer concentration is 1 micromolar (µM).

Accession number: X72623.The HsSAT2 primers can be used to quantify a control locus in chromatin immunoprecipitation (ChIP) assays with chromatin prepared from human cells. The SAT2 primers are specific for a juxtacentromeric satellite 2 repeat on chromosome 1. In most cell types this repeat is heterochromatic and enriched with histone modifications associated with heterochromatin such as Histone H3 K9 tri methylation (see image with **ab8898**). Whereas it shows low levels of histone modifications associated with active gene transcription such as Histone H3 K4 tri methylation (see image with **ab8580**).

アプリケーション **適用あり:** Real Time PCR
