The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

アプリ ケーション	Abreviews	特記事項
IHC-P		1/500 - 1/1000. Perform heat mediated antigen retrieval before commencing with IHC staining protocol. Heat up to 98 degrees C, below boiling, and then let cool for 10-20 min.
ICC/IF		1/250 - 1/500.

追加情報 Is unsuitable for WB.

ターゲット情報

機能 Component of the post-replicative DNA mismatch repair system (MMR). Heterodimerizes with MSH2 to form MutS beta which binds to DNA mismatches thereby initiating DNA repair. When bound, the MutS beta heterodimer bends the DNA helix and shields approximately 20 base pairs. MutS beta recognizes large insertion-deletion loops (IDL) up to 13 nucleotides long. After mismatch binding, forms a ternary complex with the MutL alpha heterodimer, which is thought to be responsible for directing the downstream MMR events, including strand discrimination, excision, and resynthesis.

関連疾患 Defects in MSH3 are a cause of susceptibility to endometrial cancer (ENDMC) [MIM:608089].

配列類似性 Belongs to the DNA mismatch repair mutS family. MSH3 subfamily.

翻訳後修飾 Phosphorylated upon DNA damage, probably by ATM or ATR.
