製品の概要

製品名	Alkaline Phosphatase Anti-Digoxigenin antibody [21H8]
製品の詳細	Alkaline Phosphatase Mouse monoclonal [21H8] to Digoxigenin
由来種	Mouse
標識	Alkaline Phosphatase
特異性	ab119345 reacts with free and bound digoxigenin. It is useful for detection of digoxigenin labelled compounds.
アプリケーション	適用あり: WB, ELISA, IHC-Fr, Southern Blot, ICC/IF
種交差性	交差種: Species independent
免疫原	Digoxigenin
特記事項	<p>The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.</p> <p>If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. 関連性

Digoxigenin (DIG) is a steroid found exclusively in the flowers and leaves of the plants *Digitalis purpurea* and *Digitalis lanata*. Digoxigenin is chemically closely related to Digoxin, the cardiac glycoside used for the treatment of various heart diseases. The term 'genin' at the end of Digoxigenin, refers to only the aglycone portion (without the sugar) part of the molecule, thus Digoxigenin is the steroid component of Digoxin, - minus the (digitose) sugar residues. DIG can be covalently added to proteins or nucleic acids which makes it very useful in diverse applications.
