

# Anti-Basal Bodies of Cillia antibody [LhS28] ab14373

★★★★☆ **1 Abreviews** **6 References**

### 製品の概要

製品名	Anti-Basal Bodies of Cillia antibody [LhS28]
製品の詳細	Mouse monoclonal [LhS28] to Basal Bodies of Cillia
由来種	Mouse
特異性	This antibody recognises the basal bodies of cillia in all ciliated cells.
アプリケーション	<b>適用あり:</b> IHC-P, IHC-Fr, IP
種交差性	<b>交差種:</b> Human
免疫原	Tissue, cells or virus corresponding to Human Basal Bodies of Cillia. Cytoskeletal preparation of the BHK a21 cell line expressing cillia basal bodies (Human).
特記事項	<p>The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.</p> <p>If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&amp;As</p>

### 製品の特性

製品の状態	Liquid
保存方法	Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.
バッファー	Preservative: 0.02% Sodium azide Constituent: 99.98% PBS
精製度	Protein A purified
ポリ/モノ	モノクローナル
クローン名	LhS28
ミエローマ	Sp2/0
アイソタイプ	IgG1

**The Abpromise guarantee** **Abpromise保証は、** 次のテスト済みアプリケーションにおけるab14373の使用に適用されず  
アプリケーションノートには、推奨の開始希釈率がありますが、適切な希釈率につきましてはご検討ください。

アプリケーション	Abreviews	特記事項
IHC-P	★★★★☆ (1)	Use at an assay dependent concentration.
IHC-Fr		Use at an assay dependent concentration.
IP		Use at an assay dependent concentration.

## ターゲット情報

**関連性**

Flagella and cilia both project from the cell surface and beat in distinctive patterns. Flagella are whiplike tails that propel many free-living cells, such as sperm, through fluid environments. Cilia are shorter and usually more profuse than flagella. In both flagella and cilia, nine pairs of microtubules ring two central microtubules. This arrangement is called a "9 + 2 array." A system of spokes and links holds the arrangement together. Microtubules of a flagellum or cilium arise from centrioles, which remain at the base of the completed structure as a basal body. These are sites of dense material that generate large numbers of microtubules.

**Please note:** All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

## Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.co.jp/abpromise> or contact our technical team.

## Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
