

Anti-Listeria monocytogenes antibody ab20506

2 References

製品の概要

製品名	Anti-Listeria monocytogenes antibody
製品の詳細	Rabbit polyclonal to Listeria monocytogenes
由来種	Rabbit
特異性	Recognizes whole cells of Listeria monocytogenes.
アプリケーション	適用あり: ELISA
種交差性	交差種: Listeria monocytogenes
免疫原	Tissue, cells or virus corresponding to Listeria monocytogenes. Listeria monocytogenes, ATCC 43251
特記事項	<p>The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.</p> <p>If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As</p>

製品の特性

製品の状態	Liquid
保存方法	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
バッファー	Preservative: 0.1% Sodium azide Constituent: 0.0268% PBS
精製度	Protein A purified
ポリ/モノ	ポリクローナル
アイソタイプ	IgG

アプリケーション

The Abpromise guarantee **Abpromise保証は、次のテスト済みアプリケーションにおけるab20506の使用に適用されます**
 アプリケーションノートには、推奨の開始希釈率がありますが、適切な希釈率につきましてはご検討ください。

アプリケーション	Abreviews	特記事項
ELISA		Use at an assay dependent concentration.

ターゲット情報

関連性	<p>The genus <i>Listeria</i> comprises six species: <i>L. monocytogenes</i>, <i>L. innocua</i>, <i>L. welshimeri</i>, <i>L. seeligeri</i>, <i>L. ivanovii</i> and <i>L. grayi</i>. <i>Listeria monocytogenes</i>, the most commonly isolated pathogenic member, is associated with a wide spectrum of human and animal diseases. In the smear from the original tissue, <i>L. monocytogenes</i> may appear as gram-positive coccobacilli that may be confused with <i>Streptococcus agalactiae</i> (group B), enterococci, or <i>Corynebacterium</i> spp. <i>Listeria</i> is differentiated from streptococci by a positive catalase test. <i>L. monocytogenes</i> is the only species of the genus <i>Listeria</i> that has been clearly documented as a pathogen for humans. The forms of disease caused by this organism are myriad and age-related. The most common clinical manifestations are meningitis and septicemia. <i>Listeria monocytogenes</i>, a food-borne intracellular animal and human pathogen, interacts with infected host cells both prior to entry and during the intracellular phase of infection.</p>

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.co.jp/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
