WB		Use a concentration of 1 - 5 µg/ml. This antibody has only been tested in WB against the recombinant fragment used as immunogen. We have no data on the detection of endogenous protein.

ターゲット情報

関連性 Membrane frizzled-related protein, MFRP, may have a role in eye development and may be necessary for photoreceptor maintenance. Mutations of membrane-type frizzled-related protein are associated with inherited retinal degenerations including syndromic forms of microphthalmos/retinal degeneration, a rare autosomal recessive disorder of eye development characterized by extreme hyperopia and small functional eyes, posterior microphthalmia with retinitis pigmentosa, foveoschisis, and optic disk drusen.

細胞内局在 Cell Membrane; single-pass type II membrane protein
