# Anti-Galectin 3 antibody [A3A12] ab2785

**製品名**
Anti-Galectin 3 antibody [A3A12]

**製品の詳細**
Mouse monoclonal [A3A12] to Galectin 3

**由来種**
Mouse

**特異性**
By Western blot, this antibody detects an ~30 kDa protein representing Galectin 3 from Jurkat cells transfected with human Galectin 3. Immunohistochemical staining of Galectin 3 in rat olfactory bulb yields a pattern consistent with nuclear and plasma membrane staining.

**アプリケーション**
適用あり: ELISA, IHC-Fr, WB, ICC/IF, IHC-P, ICC

適用なし: IP

**種交差性**
交差種：Mouse, Rat, Rabbit, Human

**免疫原**
Recombinant full length protein corresponding to Human Galectin 3.

**エピトープ**
The epitope for this antibody has been mapped to the first 58 amino acids of Galectin 3.

**ポジティブ・コントロール**
WB: Jurkat cells transfected with human galectin-3 IHC: rat olfactory bulb.

**特記事項**
This antibody has been shown to potentiate the binding of Galectin 3 to IgG.

---

**製品の状態**
Liquid

**保存方法**
Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C or -80°C. Avoid freeze / thaw cycle.

**バッファー**
Preservative: 0.05% Sodium azide
Constituent: 99% PBS

**精製度**
Affinity purified

**一次抗体**
This antibody has been shown to potentiate the binding of Galectin 3 to IgG.

**クローン名**
A3A12

**アイソタイプ**
IgG1
Our **Abpromise guarantee** covers the use of **ab2785** in the following tested applications.
The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

**追加情報**

Is unsuitable for IP.

**ターゲット情報**

**機能**
Galactose-specific lectin which binds IgE. May mediate with the alpha-3, beta-1 integrin the stimulation by CSPG4 of endothelial cells migration. Together with DMBT1, required for terminal differentiation of columnar epithelial cells during early embryogenesis.

**組織特異性**
A major expression is found in the colonic epithelium. It is also abundant in the activated macrophages.

**配列類似性**
Contains 1 galectin domain.

**細胞内局在**
Nucleus. Cytoplasmic in adenomas and carcinomas. May be secreted by a non-classical secretory pathway and associate with the cell surface.
All lanes: Anti-Galectin 3 antibody [A3A12] (ab2785) at 1/1000 dilution

Lane 1: MCF-7 cell lysate
Lane 2: HeLa cell lysate
Lane 3: NIH-3T3 cell lysate

Lysates/proteins at 25 µg/ml per lane.

Predicted band size: 26 kDa
Observed band size: 30 kDa

why is the actual band size different from the predicted?

ab2785 labelling Galectin 3 in the nucleus and cytoplasm of Human ovarian carcinoma tissue (right) compared with a negative control (left) by Immunohistochemistry (formalin/PFA-fixed paraffin-embedded sections). To expose target proteins, antigen retrieval method was performed using 10mM sodium citrate (pH 6.0) microwaved for 8-15 min. Following antigen retrieval, tissues were blocked in 3% H2O2-methanol for 15 min at room temperature. Tissue sections were incubated with the primary antibody (1:100 in 3% BSA-PBS) overnight at 4 ºC. A HRP-conjugated anti-mouse IgG was used as the secondary antibody, followed by colorimetric detection using a DAB kit. Tissues were counterstained with hematoxylin and dehydrated with ethanol and xylene to prep for mounting.

ab2785 labelling Galectin 3 (green) in the cytoplasm and nucleus of HeLa cells by Immunocytochemistry/Immunofluorescence. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were incubated with the primary antibody (1:100 in 3% BSA-PBS) overnight at 4 ºC. A DyLight-conjugated anti-mouse was used as the secondary antibody. Red (phalloidin) - F-actin, Blue - nuclei. Images were taken at a magnification of 60x.
ab2785 labelling Galectin 3 (green) in the cytoplasm and nucleus of NIH-3T3 cells by Immunocytochemistry/Immunofluorescence. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were incubated with the primary antibody (1:100 in 3% BSA-PBS) overnight at 4 ºC. A DyLight-conjugated anti-mouse was used as the secondary antibody. Red (phalloidin) - F-actin, Blue - nuclei. Images were taken at a magnification of 60x.

Western blot using ab2785 at 1:1000. Review by Bo Su submitted 26 July 2004.

ICC/IF image of ab2785 stained HeLa cells. The cells were 4% PFA fixed (10 min) and then incubated in 1%BSA / 10% normal goat serum / 0.3M glycine in 0.1% PBS-Tween for 1h to permeabilise the cells and block non-specific protein-protein interactions. The cells were then incubated with the antibody (ab2785, 5µg/ml) overnight at +4°C. The secondary antibody (green) was Alexa Fluor® 488 goat anti-mouse IgG (H+L) used at a 1/1000 dilution for 1h. Alexa Fluor® 594 WGA was used to label plasma membranes (red) at a 1/200 dilution for 1h. DAPI was used to stain the cell nuclei (blue) at a concentration of 1.43µM.
Immunohistochemistry (Frozen sections) analysis of human retina tissue sections labeling Galectin 3 with ab2785 at 1/200 dilution. Tissue was fixed with paraformaldehyde, followed by blocking with 10% serum for 30 minutes at 24°C. The tissue was incubated with ab2785 at 1/200 for 2 hours at 24°C in PBS. A polyclonal goat anti-mouse Alexa Fluor® 488 secondary antibody was used at 1/1000 dilution.

ab2785 staining Galectin 3 in rat spleen tissue by Immunohistochemistry (Frozen sections). Tissue was fixed in paraformaldehyde, blocked with 20% serum for 20 minutes at 24°C, then incubated with ab2785 at a 1/200 dilution for 16 hours at 4°C. The secondary used was an Alexa-Fluor 488 conjugated donkey anti-mouse polyclonal used at a 1/1000 dilution. Counterstained with Hoechst 33258 (blue).

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours

- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.co.jp/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
