製品の概要

製品名	Anti-p13 antibody [BM3]
製品の詳細	Mouse monoclonal [BM3] to p13
由来種	Mouse
特異性	This protein A purified mouse monoclonal antibody reacts specifically with p13 in human granulocytes and monocytes residing in lymphoid and non-lymphoid tissues. The antibody recognizes a 13 kDa band corresponding to p13
アプリケーション	適用あり: ELISA
種交差性	交差種: Human
免疫原	Tissue, cells or virus corresponding to p13. A BALB/c mouse was immunized with nuclei from Pokeweed mitogen stimulated human peripheral blood lymphocytes
特記事項	BM3 is an early marker of myeloid differentiation. Immunoprecipitation experiments using S35 methionine labeled human myeloid leukemia cells show that BM3 identifies a 13 kDa protein. The antibody does not stain tissue after paraffin treatment. The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. ターゲット情報

関連性 p13 is a specific marker for human myeloid cells. Induction studies using HL-60 cells show that p13 is expressed during the early phases of myeloid differentiation. The mAb anti-p13 recognizes a nuclear antigen expressed in human granulocytes (98%) and monocytes (80%) residing in lymphoid and non-lymphoid tissues.
