製品の概要

製品名 Anti-Transferrin Receptor antibody [MEM-189]

製品の詳細 Mouse monoclonal [MEM-189] to Transferrin Receptor

由来種 Mouse

特異性 The antibody MEM-189 reacts with CD71 antigen (transferrin receptor), a 95 kDa type II

homodimeric transmembrane glycoprotein expressed on activated B and lymphocytes,

macrophages and erythroid precursors; it is lost on resting blood leukocytes. The antibody MEM-

189 does not block binding of transferrin to the receptor.

アプリケーション 適用あり: Flow Cyt

適用なし: ICC/IF

種交差性 交差種: Human

免疫原 Tissue, cells or virus corresponding to Human Transferrin Receptor. KG1 human acute

myelogenous leukaemia cell line

ポジティブ・コントロール Flow Cyt: K562 cells.

特記事項 The Life Science industry has been in the grips of a reproducibility crisis for a number of years.

Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets

your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be

found below, along with publications, customer reviews and Q&As

製品の特性

製品の状態 Liquid

保存方法 Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C or -

80°C. Avoid freeze / thaw cycle.

**バッファー** pH: 8.0

Preservative: 0.097% Sodium azide

Constituent: Tris buffer

精製度 Protein A purified

**ポリ/モノ** モノクローナル

1

クローン名

MEM-189

アイソタイプ

lgG1

#### アプリケーション

**The Abpromise guarantee** <u>Abpromise保証は、</u>次のテスト済みアプリケーションにおけるab1086の使用に適用されます アプリケーションノートには、推奨の開始希釈率がありますが、適切な希釈率につきましてはご検討ください。

アプリケーション	Abreviews	特記事項
Flow Cyt	*** <u>*</u>	Use a concentration of 2 µg/ml.

追加情報

Is unsuitable for ICC/IF.

#### ターゲット情報

LAIA	Falls

Cellular uptake of iron occurs via receptor-mediated endocytosis of ligand-occupied transferrin receptor into specialized endosomes. Endosomal acidification leads to iron release. The apotransferrin-receptor complex is then recycled to the cell surface with a return to neutral pH and the concomitant loss of affinity of apotransferrin for its receptor. Transferrin receptor is necessary for development of erythrocytes and the nervous system (By similarity). A second ligand, the heditary hemochromatosis protein HFE, competes for binding with transferrin for an overlapping C-terminal binding site. Positively regulates T and B cell proliferation through iron uptake (PubMed:26642240).

(Microbial infection) Acts as a receptor for new-world arenaviruses: Guanarito, Junin and

Machupo virus.

**関連疾患** Immunodeficiency 46

**配列類似性** Belongs to the peptidase M28 family. M28B subfamily.

Contains 1 PA (protease associated) domain.

翻訳後修飾 N- and O-glycosylated, phosphorylated and palmitoylated. The serum form is only glycosylated.

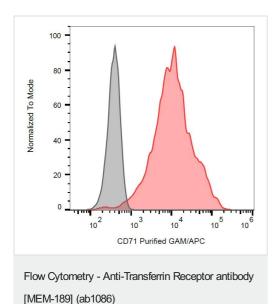

Proteolytically cleaved on Arg-100 to produce the soluble serum form (sTfR).

Palmitoylated on both Cys-62 and Cys-67. Cys-62 seems to be the major site of palmitoylation.

**細胞内局在** Secreted and Cell membrane. Melanosome. Identified by mass spectrometry in melanosome

fractions from stage I to stage IV.

## Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <a href="https://www.abcam.co.jp/abpromise">https://www.abcam.co.jp/abpromise</a> or contact our technical team.

### Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
